Place upper right corner (0) of this protractor at the lower left corner of four digit grid square. Then slide protractor right until you reach the third and fourth digit of first half of grid coordinates. Then slide protractor up until you reach the third and fourth digit of second half of grid coordinate. The upper right corner of protractor (0 point) now rests at the eight digit grid location. If 10 digit grid, approximate the fifth digits to refine your plotting of the grid.

**Ensure your protractor remains parallel with grid square lines on the map.**
